

### **Layer 1: System Prompt**

Workflow order, structural constraints,  
term naming conventions

*Suppresses  
errors*

### **Layer 2: External Pipeline**

Paren balance, style-convention scan,  
variable scoping, term cross-ref

*Catches struc-  
tural errors*

### **Layer 3: Human Judgment**

Causality direction, absolute vs. tendency-  
based, rule strength

*Catches se-  
mantic errors*

### **Layer 4: Theorem Prover**

Validates rules support intended  
inferences via ATPs

*Catches infer-  
ence gaps*
